Lindani Dube

Full-stack & mobile developer · ICT teacher

Manzini, Eswatini | **lindanidube2425340@gmail.com**
Portfolio: **lixnswizz.github.io** | GitHub: **github.com/LixnSwizz**

Profile

Software developer with four years of building and running production systems, and an ICT teacher at Moyeni High School. I design and build secure, data-heavy web and mobile applications with Laravel, React and React Native, from the database and APIs to the screens people use. My work includes **OYA Insuretech**, a multi-tenant insurance platform used for thousands of policies, and **WaiPlanner**, an AI lesson-planning and assessment platform built around Eswatini's EGCSE, JC and CBE syllabi and used by 261 educators. I started coding in 2018, before AI coding tools existed; I now use them daily and review every change before it ships. Teaching means I know assessment from the classroom side as well as the code side.

Key strengths

- ✓ **Web and mobile applications**
  Laravel 12, PHP 8, React with Inertia, React Native with Expo and TypeScript.
- ✓ **Secure development**
  Role-based access, tenant isolation, expiring API tokens, rate limiting, audit trails, 2FA.
- ✓ **DevOps and production support**
  Git, GitHub, PHPUnit, Supervisor queue workers, Ubuntu, DigitalOcean, incident diagnosis.
- ✓ **Education and assessment**
  ICT teacher (IGCSE/EGCSE, CBE); built syllabus-aligned assessment with human verification.
- ✓ **APIs and integration**
  Versioned REST APIs, OAuth 2.0 / OpenID Connect, SMS, the OpenAI API, bulk and syllabus imports.
- ✓ **Databases**
  MySQL/MariaDB schema design, a double-entry ledger, reporting, query tuning, data migration.
- ✓ **AI-assisted development**
  Claude Code and ChatGPT daily, every change reviewed; AI drafting and marking in production.
- ✓ **Independent delivery**
  Plan, build, test and ship releases across several live products alongside teaching.

Software development experience

OYA Insuretech

Sep 2022 – Present

Full-stack product developer, multi-tenant insurance platform | **oyainsuretech.com**

- Built and maintain a live platform that insurers use for policy administration, claims, invoicing, a double-entry ledger, reporting, SMS campaigns and an agent portal, with **thousands of policies** in production.
- Designed tenant-aware data access and role permissions, with separate sign-in flows for staff, clients and corporate users and **two-factor authentication** for super-admins.
- Designed a **versioned client REST API** with scoped, expiring Sanctum tokens, rate limiting and audit trails; it powers the React Native client app.
- Cut one page load from **3.8 s to 0.3 s** by removing N+1 queries and tuning pagination; handled bulk imports and legacy-data migration.
- Run deployments and background workers on Ubuntu and DigitalOcean, diagnose production incidents and ship ongoing releases backed by PHPUnit tests.

Stack: Laravel 12, PHP 8.4, React 18, Inertia 2, Tailwind CSS, MySQL/MariaDB, Sanctum, PHPUnit, Ubuntu, Supervisor, DigitalOcean

WaiPlanner

2026 – Present

Creator and developer (own product) | **waiplanner.waidone.com**

- Built and launched an AI lesson-planning and assessment platform aligned to Eswatini's EGCSE, JC and CBE syllabi: **261 educators** and **1,073 lesson plans** across 32 subjects (November 2026).
- Turns uploaded exam papers and marking schemes into assessments; AI-drafted questions **cannot be published until a teacher verifies them** against the source.
- Runs timed assessments with a live monitor and one-tap extra time, and AI-assisted marking of typed and handwritten answers, with rubrics for essays.

- Implemented Google sign-in (OpenID Connect), school workspaces with invitations and roles, teacher, learner and parent accounts, subscriptions, payments and creator payouts.
- Added syllabus import with validation and a change preview, and queued AI jobs with daily usage limits; deployed on DigitalOcean App Platform.

Stack: Laravel 12, PHP 8.5, React, Inertia, OpenAI API, queue workers, automated tests, DigitalOcean App Platform

Chosen Generation

2022 – Present

Developer and IT support

- Software development and maintenance for the organisation.
- System administration and technical support.

MC Tech Systems

May 2021 – Dec 2021

Full-stack developer and IT support | **Mbabane**

- Developed web applications as a full-stack developer at a software development company.
- Handled system administration, software installations, troubleshooting and technical support.

Teaching experience

Moyeni High School

Current

ICT teacher

- Teach ICT at senior secondary level (IGCSE/EGCSE) and at junior secondary level under the competency-based curriculum (CBE, Grades 8–9).
- Plan lessons, set and mark assessments against the national ICT syllabi, and prepare candidates for external examinations.

Selected projects

OYA client app (React Native, Expo, TypeScript). A nine-screen app where insurance clients sign in with a token and see live insurance data; sign-in tested on a client's Android device, store release in progress.

Eswatini Creator Connect (Laravel, React, TypeScript). Early-stage marketplace for creators and brands, designed with deal rooms, reviews, disputes and an escrow ledger.

Written before AI, 2021–2022 (Laravel, PHP, MySQL, Tailwind CSS). A savings and loan management system in Laravel (2021), plus a Laravel job board, a PHP and MySQL social network and a Tailwind landing page, public on GitHub since July–August 2022.

Technical skills

Languages	PHP, JavaScript, TypeScript, SQL, HTML5, CSS3
Frameworks	Laravel 12, React 18, Inertia 2, React Native, Expo, Tailwind CSS, Alpine.js, Bootstrap
Data	MySQL, MariaDB, schema design, query optimisation, migrations
APIs and security	REST, OAuth 2.0 / OpenID Connect, Laravel Sanctum, role-based access control, two-factor authentication, rate limiting, audit logging
DevOps and tools	Git, GitHub, PHPUnit, Supervisor, Ubuntu Linux, DigitalOcean, App Platform, queues and task scheduling
AI	OpenAI API, Claude Code, ChatGPT
Transferable to .NET	MVC, ORM, dependency injection, middleware, migrations and background jobs map directly to ASP.NET Core and Entity Framework Core

Education

STD in Information and Communication Technology

2018 – 2021

Eswatini College of Technology | **Mbabane**

Self-study: W3Schools courses in HTML, CSS, JavaScript, PHP, Bootstrap and AJAX.

Languages

English and siSwati, full professional proficiency
