Lindani Dube

FULL-STACK & MOBILE DEVELOPER

Eswatini | lindanidube2425340@gmail.com | github.com/LixnSwizz

Full-stack and mobile developer with four years building and operating a multi-tenant insurance platform used for thousands of policies. Experienced in Laravel, React, MySQL, secure REST APIs, background processing and Linux deployments. I combine product delivery with hands-on production support, automated testing and a plan-then-verify approach to AI-assisted development.

CORE STACK & TECHNICAL SKILLS

PHP | Laravel | React | MySQL | Tailwind | JavaScript

Backend & data: PHP 8.4, Laravel 12, MySQL/MariaDB, REST APIs, Sanctum, queues, SQL tuning

Frontend & mobile: React 18, Inertia 2, JavaScript, TypeScript, Tailwind, React Native, Expo

Delivery: Ubuntu, DigitalOcean, Supervisor, Git, GitHub, PHPUnit, Node tests

PRODUCT EXPERIENCE

OYA Insuretech | Full-stack product development

September 2022 - Present | Insurance platform

- Built and maintained a live multi-tenant platform for insurers, covering policy administration, claims, invoicing, a double-entry ledger, reporting, SMS campaigns and an agent portal.
- Developed Laravel services and React/Inertia interfaces backed by MySQL, including tenant-aware data access, role permissions and staff, client and corporate authentication flows.
- Designed a versioned client REST API with scoped, expiring Sanctum tokens, plus controls such as rate limiting, audit trails and two-factor authentication for super-admins.
- Removed N+1 queries and tuned pagination to reduce one page load from 3.8 seconds to 0.3 seconds; also handled bulk imports and legacy-data migration.
- Operated web deployments and background workers on DigitalOcean and Ubuntu, diagnosed production incidents and supported ongoing releases.

MC Tech Systems | Full-stack development and IT support

May 2021 - December 2021 | Mbabane, Eswatini | Software development, system administration, installations and technical support

SELECTED PROJECTS

OYA Client App + API - React Native, Expo, TypeScript, Laravel. Built a nine-screen app with token sign-in and live insurance data; tested sign-in on an Android client device. Store publication is in progress.

AI Lesson Planner - Laravel, React, OpenAI. Built lesson-plan and assessment generation with document ingestion, usage limits, automated tests and a dedicated worker.

Eswatini Creator Connect - Laravel, React, TypeScript. Early-stage creator and brand marketplace with deal rooms, reviews, disputes and an escrow ledger.

EDUCATION & LANGUAGES

STD in Information and Communication Technology - Eswatini College of Technology, 2018 - 2021. **Languages:** English and siSwati.
